Have you been travelling and been confused about finding museums or galleries ?

And, then there's the irritation of discovering something interesting on your last day in a city, only to have insufficient time to visit that Museum or Gallery.

Most people leave it until you get there to work out what you want to see.
That way so much time is wasted - and they probably miss out on something interesting.

Museum-Tracker is an eBook Directory giving details of hundreds of significant museums and galleries in England and Europe, assisting travellers in finding those opportunities.

Know what's on

It lists significant temporary exhibits and displays, with a cross-reference to details of the Museum or Gallery staging the exhibit.

Beat the queues

There are details on how to advance purchase tickets (if necessary) - helping you beat the queues.

Museum-Tracker Exhibits Report

Update for travellers of temporary exhibits and events at European Museums, Galleries and heritage sites. Available as a downloadable PDF at http://www.museum-tracker.com/M-T_E-R.html

In an eBook

The eBook (mobipocket format) also contains the information of Temporary Exhibits, plus the Directory of significant Museums and Galleries in Europe and England.

So, Museum-Tracker has been developed as an eBook directory of English and European Museums and their exhibits, with the aim of assisting traveller's in not missing those opportunities ...

It's designed for use on the traveller's PDA or web enabled PHONE.

What they exhibit, where they are and how to get there.

The information is categorised by

- major Cities and Regions,
- a Museum's main focus
- the Museum name

What information is provided on Museums/Galleries

- a brief description of their exhibits
- details of their opening days and times
- the museum's Entry fee (if any)
- their Address and contact details
- booking and advance ticketing details (where applicable)
- Public transport to the museum

How to access Museum-Tracker

Info on featured Temporary Exhibits is available as a downloadable PDF – the Museum-Tracker Exhibits Report for \$us 1.95

There is also a sample version of the Report available for free.

For access to both, go to http://www.museum-tracker.com/M-T_E-R.html

This is also incorporated into the downloadable full version of the Museum-Tracker eBook for \$us9.95

This is available in several formats

- mobipocket (for PDAs and PHONES with the freeware mobipocket Reader installed)
- Microsoft eBook Reader (for PDAs and PHONES with MS Reader installed - usually by default)
- As a Windows programme (for Windows Notebook and Desktop computers)

Details at -<http://www.museum-tracker.com/>

About the Author

How Museum-Tracker came about

Museum-Tracker is the end result of my growing interest in 'finding the original'.

With an engineering background, my original interest lay in early mechanical and scientific inventions, leading me to become a Foundation Member of Sydney's Powerhouse Museum when it opened in 1987. Here I found, for example, one of the Boulton & Watts Beam Engines.

Travel to Europe obviously widened considerably the opportunity to witness some of the greatest inventions of all time, such as Stevenson's Rocket (railway locomotive) in the Science Museum in London. There was a profound sense of awe in finding myself in front of the original engine, a seeming myth ever since childhood. I was surprised to find how the reality was so much smaller than I imagined; yet this in no way diminished the sense that I was standing in the presence of a genius, of something which had fundamentally changed the way the world worked.

This whetted my curiosity to track down other original inventions and I was stunned to find how many had survived. But tracking down where the original of an invention is now housed is a time-consuming occupation.

How handy it would be to have a guide which had done the work for you, not only in relation to science, but covering a multitude of interests. Better still, if it were also able to keep you informed of the temporary exhibits for which the major museums glean priceless artifacts from all over the world.

Enter Museum-Tracker.
